🍃 BENEFITS

**ABACUS®** is a powerful tool for modelling, understanding, and analysing complex enterprises across people, process and technology. Using world leading, patented technology, ABACUS® analyses the trade-offs between multiple architectures and helps enterprises achieve the optimal roadmap prior to investment.

ABACUS® has demonstrated the following high-level benefits:

Rapid bid production by simple drag-and-drop of existing/common patterns/solutions;

Seamless hand-over from bid to delivery team of a consistent model;

Faster time from project initiation to design review for projects, programmes, transformations;

 More accurate and reliable recommendations from the architecture team thereby minimising the risk of making "wrong" or costly decisions;

Greater re-use of existing solutions/resources;

| • | Consistency | across acc | counts to max | imise knowle | dge and reso | urce sharing; | and |  |  |

|   |             |            |               |              |              |               |     |  |  |
|   |             |            |               |              |              |               |     |  |  |
|   |             |            |               |              |              |               |     |  |  |
|   |             |            |               |              |              |               |     |  |  |
|   |             |            |               |              |              |               |     |  |  |
|   |             |            |               |              |              |               |     |  |  |
|   |             |            |               |              |              |               |     |  |  |
|   |             |            |               |              |              |               |     |  |  |
|   |             |            |               |              |              |               |     |  |  |
|   |             |            |               |              |              |               |     |  |  |
|   |             |            |               |              |              |               |     |  |  |
|   |             |            |               |              |              |               |     |  |  |
|   |             |            |               |              |              |               |     |  |  |
|   |             |            |               |              |              |               |     |  |  |
|   |             |            |               |              |              |               |     |  |  |
|   |             |            |               |              |              |               |     |  |  |

Maximum efficiency gains due to expert knowledge and application.

Furthermore, the following tangible benefits have been declared by ABACUS® certified practitioners:  $\frac{1}{2} \left( \frac{1}{2} \right) = \frac{1}{2} \left( \frac{1}{2} \right) \left( \frac{1}$ 

3 months analysis exercise reduced from 3 months to 3 weeks;

 Delivery of a fully costed solution architecture for a bid in a single day, as opposed to a minimum of 3-4 weeks - 15x to 20x improvement;

 20-30% better success rate of proposals due to the quality and accuracy of the recommendations from ABACUS;

3x reduction in the project initiation to review time-cycle;

Up to 50% reduction in architecture office resources to output the same (and in most cases better) support
to the business;

Avoidance of additional costs through making a wrong decision through gut-feelings;

 Exploitation of a common meta-model with a predicted overall 10-20% efficiency improvement across the board; and

2x productivity increase by "parachuting in" centralised ABACUS experts.
